

PVS Webmaster's/Technology Report

January 12, 2009

PVS Laptops: I spent some time with all four of the PVS Microsoft Vista-based laptops. The purpose of the task was to get them set up as a Meet Manager network, something which did not work at the Tom Dolan Meet. I got the network working, and will write up instructions for the PVS Equipment Manager and PVS Referees on the procedures to use for setting it up. This will be ready for the March championship meets.

While I had the computers, I updated all the software, cleaned off stuff that wasn't needed and tested the drivers for the USB-to-Serial interfaces.

Meet Results: The processing of meet results is going well. I'm getting most results within a few days of the meet. The results are loading into SWIMS with few problems. The biggest problem is relays with no names.

RSS Feed: The RSS feed that was begun about a year ago will be shut off for lack of interest. I haven't updated it in over a month, and haven't received one question or complaint.

Meet Announcements: The meet announcements for all the March championship meets are posted (due to Terri).

PVS Records: The PVS LCM records have been updated by the Records Chair. He is working on updating the SCY records.

New Website Feature: I've extracted the top ten times for PVS swimmers in each event and each age group and posted it on the website. I plan on updating it about once a month during the SCY season. I've received a number of positive feedback on this new feature.

Website Statistics: Attached are the statistics for December 2008. As you can see, the website is popular.

Tim Husson
