

Potomac Valley Swimming Webmaster's/Technology Report

February 14, 2011

New Web Hosting

January was the first month with the new web hosting company. It is working out well. The previous hosting has been discontinued. I was able to shutdown the second domain pvswwim2.org and direct any residual traffic to the current site. This greatly simplifies website maintenance.

Real-Time Results

The PVS website provided real-time results support for the IMX Meet at Takoma Aquatic Center on February 4-6, 2011.

Recent Activity

This is a busy time of year for the web site. The following are some of the activity in the last month.

- Meet announcements for all the March championship meets are posted (mostly due to Terri's hard work)
- Applications to officiate the March championship meets are posted
- I created a new Diversity Page for use by the Diversity Committee
 - <http://www.pvswim.org/diversity.html>
- I've been posting 2011 High School results. Nine meets have been posted so far, with more to come
- I posted a form for PVS officials to request reimbursement for their background screening fees
