

## Potomac Valley Swimming Webmaster's/Technology Report

November 7, 2011

### Webmaster

The major activity the past month has been supporting meets in PVS:

- meet announcements and event files
- meet psych sheets and timelines
- meet results

The Travel Assistance page <<http://www.pvswim.org/travelasst.htm>> has been updated with all the items from the October Board Meeting.

### Technology

I continue to maintain three PVS meet computers which have been used as follows:

- one computer used for Hy-Tek and CTS clinics
- one computer used at the PVS October Open
- two computers used at the PVS November Open

I bought another set of radios and some additional headsets at the direction of the Operations Vice-Chair. I also revived a set of the older PVS radios. PVS now has four full sets of working radios plus spares. Radios have been provided to all PVS-sponsored meets (Oct & Nov Opens).
