Potomac Valley Swimming
Webmaster's/Technology Report

April 16, 2012

Webmaster

Below are some of the highlights of activity for the last month.

Email Lists – This task is progressing. I have created a new list for the Executive Board. I also created a list for any PVS member to join to get breaking news (such as the last minute schedule changes that occurred for the January Open and 18&U Championships meets). I created a webpage where members can sign up for the various lists (News, FlashMail, Officials, Coaches).

Web Site Statistics – With all the championship meets in March, including a Sectional meet in PVS, the website had its biggest month ever for traffic. See the attached report for the statistics from March.

Real-Time Results – The website supported real-time results for the Junior/Senior Championships, Junior Olympics Championships and Sectionals meets.

Records Update – There were a large number of PVS records broken at meets in January, February and March. The PVS Records Chair is nearly completed with updating all the records. The updated records files should be posted soon.

Qualifying Times – The qualifying times for all the summer championship meets have now been posted.

Olympic Trials Qualifiers – The list of PVS Olympic Trails Qualifiers has been updated. There are now 39 qualifiers listed. The list does not include new qualifiers from the NCSA Junior Meet in Orlando..

Technology

Three PVS computers were used in a network configuration for the Junior Olympic Championships Meet. The PVS broadband internet service was used to provide real-time results.

PVS radios were used at the PVS Senior Championships, PVS Junior Championships and PVS Junior Olympic Championships meets.

Thanks to the Operations Chair and the Executive Director, new Velcro strips for mounting touchpads were procured for the Junior Olympics Meet. Along with the other new PVS equipment (78" pads, harnesses, and buttons), the equipment worked well for the Junior Olympics meet.

Comments and suggestions are always welcome.
