

Operational Risk Management Report 2021

To the Potomac Valley Swimming LSC House of Delegates

Potomac Valley Swimming continues to do well compared to most all LSCs Risk Management. Our rate of Reports Of Occurrence (ROO) show that we take the steps needed to keep our Swimmers, Coaches, Officials and Volunteers safe. The Novel Coronavirus Pandemic has truly shown in a series of actions taken by the LSC the depth of leadership's dedication to its members.

- Reducing the prospect of injury or loss to members of the LSC
- Assisting members of the LSC in identification of errors, system failures, and other potentially dangerous activity;
- Providing assistance in developing plans to mitigate occurrences that disrupt LSC operations or events;
- Identifying trends that increase LSC operational risk.

This has certainly been taxed to the maximum by the Pandemic.

The committee is looking for athlete, coach, and non-athlete members. If you are searching for a career the

Operational Risk Management Report 2021

**To the Potomac Valley Swimming LSC
House of Delegates**

field of Risk Management is a very rapidly growing area as a result of the new awareness the Pandemic has created. Experience gained on the committee can provide valuable educational opportunities as well as great College Application/Resume material.

**Every Decision is a Risk.
Every Risk is a Decision.**

Respectfully submitted,

Kurt Thiel

Operational Risk Management Chair
